Besançon - France

## Précitechnique triumphs in all its glory at the trade show Micronora

The international exhibition of micro-technology and precision gathered this year from 27 to 30 September in Besançon, on 25,000 m<sup>2</sup> of exhibition space, about 850 exhibitors, 34% coming from abroad. A rich program for the visitors which gave them the possibility to find their happiness.

Précitechnique and DED Production have bet on their know-how, quality of service and especially on their numerous years of experience in the field of stamping, deep drawing and precision cutting.

*The technical and commercial team of Précitechnique and DED Production*

Through their countless fields of application and their strong international reputation, the two companies have a valuable asset that allows visitors to find the solution to their investment and development projects.
